

Preparing the Printer For Travel or Shipment

Note: Flush the ink system and leave cleaning solution in the tubes and dampers. Make sure to dispose of the waste ink and empty the ink bottles back into their appropriate ink containers before preparing the printer. Turn all valves to the closed position.

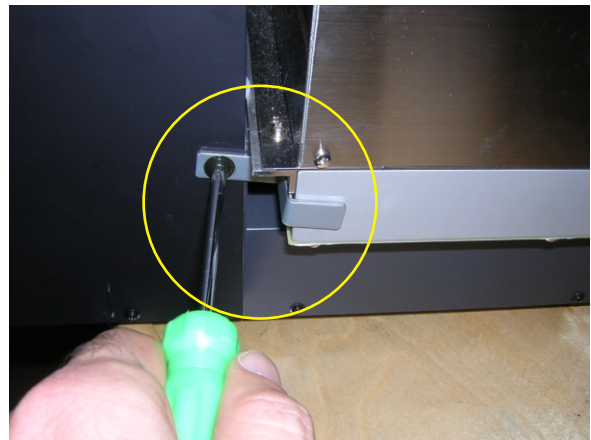

1. Use tape to secure the print head.
2. Secure the tray bed with the locking clamps.
3. Tape the print head dust cover down.
4. Make sure the ink bottle cover and valve cover are secure.
