- \* Ships Fully Assembled
- \* 1 Year Parts Warranty

### OPTIONS

- \* Floor Legs
- \* Foot Pedal
- \* Wheel Casters
- \* Extra Nozzle
- \* Extra Bottle

### REQUIREMENTS

- \* Electrical – 120 Volts, 1-Phase, 5 Amps
- \* Air – 40 PSI, 1/4" Quick-Connect Air Coupler
- \* Air Compressor (Not Included)

- Complete control of applying pretreatment solution anywhere on the platen.
- Consistent flow of pretreatment solution with a no-drip nozzle.
- Approved for multiple types of pretreatment solutions and cleaning fluids.
- Complete access to spray chamber for easy cleaning.

The key to white ink direct-to-garment (DTG) printing is being able to apply a consistent layer of pretreat solution on to the garment. The Pre-Treat Express gives the user full control over the amount and location of pretreat solution that is applied. Benefits include speed, consistency and reduced cost of solution. The easy-to-use Control Panel makes pretreating garments simple for even mechanically challenged people. Simply turn the Pre-Treat Express and the air compressor on, load the garment and press the Start Cycle button. Within 10 seconds, you have a pretreated garment ready to be cured.

By removing the top lid, the user has complete access to clean the entire inside of the Pre-Treat Express. Using the Prime / Clean button allows the user to watch the pretreatment being flushed out of the clear supply line. The no-drip nozzle can easily be detached for detailed cleaning as well.

The Pre-Treat Express is an industrial built piece of equipment that comes fully assembled and ready to use. The one year parts warranty provides additional guarantee that the purchase of the Pre-Treat Express is a smart choice for any DTG business.
